Education

Vellore Institute of Technology Bachelor of Technology in Computer Science	Jul 2023 – Jun 2027(Expected) CGPA: 8.94
St Joseph's Convent School CBSE Senior Secondary School Certificate	Apr 2010 – Mar 2022 10th: 93.00% 12th: 93.00%
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Design, Database Management Systems, Computer Networks, Operating Systems, Artificial Intelligence	

Technical Skills

Programming Languages: Python, C++, Java, JavaScript
Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS
Backend: Node.js, Express.js, Flask, REST APIs
Databases: MongoDB, PostgreSQL, MySQL, Firebase
Data Analysis & Visualization: Pandas, NumPy, Feature Engineering, Dashboarding, Data-Driven Decision Making
Machine Learning: TensorFlow, PyTorch, Scikit-learn, XGBoost, CNN, LSTM, NLP
Soft Skills: Prioritization, Team Collaboration, Cross-functional Communication, Agile Methodologies

Work Experience & Extracurricular

Agentic AI Intern Jharkhand Police Headquarters	Ranchi, Jharkhand May 2026 – Jul 2026
- Architected an Agentic AI-Leveraging case intelligence system using LLMs and Retrieval-Augmented Generation (RAG) to accelerate the analysis of police investigation documents, improving processing efficiency by 70%. - Enhanced document intelligence by integrating OCR, FAISS, semantic search, and multi-agent workflows, enabling automated case summaries, timeline generation, and contextual search while reducing manual effort by 60%.	
Summer Research Intern Vellore Institute of Technology	Remote, India May 2025 – Jul 2025
- Implemented a GRU-based Speech Emotion Recognition model with attention using PyTorch and MFCC features from the BSER dataset, improving classification performance by 12% compared to the baseline. - Applied Monte Carlo Dropout and Explainable AI through Captum's Integrated Gradients to quantify prediction uncertainty and improve model interpretability by 40%, enabling more reliable emotion recognition.	

Projects

Revia – React.js, AWS Lambda, DynamoDB, Amazon Cognito, RAG	GitHub Jul 2026
- Built an AI companion platform powered by LLMs and Retrieval-Augmented Generation (RAG) on a fully serverless AWS architecture using Lambda, API Gateway, DynamoDB, and Cognito, supporting 12+ AI personas with secure, real-time conversations. - Designed a multi-agent conversation engine with long-term memory, semantic retrieval, and RAG, improving conversational consistency by 65% while delivering more natural, context-aware interactions.	
IPL Intelligence Dashboard – Python, Pandas, Plotly, Streamlit	GitHub Mar 2026
- Created an interactive IPL analytics dashboard using ball-by-ball match data, transforming over 250,000+ deliveries into actionable performance insights through interactive visualizations and statistical analysis. - Engineered custom performance metrics, including the Pressure Performance Index, death-over efficiency, and chase analysis, improving decision-making efficiency by 55% through data-driven insights beyond conventional cricket statistics.	
AI-Powered Resume Analyzer – Python, Flask, NLP, Scikit-learn	GitHub Jan 2025
- Developed an AI-Leveraging resume analysis platform using Python, Flask, and NLP to evaluate resumes against job descriptions, improving candidate-job matching accuracy by 70% through automated relevance scoring. - Built a text preprocessing and skill extraction pipeline to identify missing skills, generate personalized skill-gap insights, and streamline resume evaluation by 60%.	

Certifications & Achievements

Top 50 at Smart India Hackathon 2025 – Created an Entrepreneurship support website.	Sept 2025
Google Machine Learning Crash Course – Google	May 2025
Top 15, HackFest 2024 – Developed a real-time Tsunami Simulation Application.	Sep 2024
Member , Enactus & Event Managers Club, VIT Chennai	Jul 2024
